Personal data

Family name: van Wagenberg
Surname: Quinten
Date of birth: May 15th 1987
Place of birth: Geldrop. The Netherlands
Nationality: Dutch
Marital status: Unmarried
Driving licence: B (Dutch driving permit)
Telephone: +316 450 938 53
E-mail: quintenvw@gmail.com
Portfolio: www.naqoys.nl

Who I am

It is my passion to improve existing products and services in terms of refinement, utility and smartness. For me attainability is important when developing ideas and concepts. I first investigate the conscious and hidden needs and wishes of users. During each step of the design and production process these needs are being validated. I use many of the available tools within ICT when I design or improve products and services. This was always the focus of my design projects and of my bachelor study at the Fontys University.

I am a curious person. I optimize the use of products or services by solving evident or hidden problems. Step by step I discover ways to improve them. At the same time I investigate trends and developments in ICT and lifestyle to be able to integrate them in my designs. In summary I am an expert in finding ways to improve products and services by combining my skills in ICT with my knowledge of trends in my field. It is my preference to work in a multi-disciplinary team, to attain through research & development, a working prototype the end product with satisfied users.

Education

2013 - 2018 Bachelor of Science Information & Communication Technology, Major Lifestyle - Fontys Hogescholen; University of Applied Sciences, Eindhoven, The Netherlands.
2016- 2017 Minor Product Design (Exchange program) - Otago Polytechnic, Dunedin, New-Zealand.
2008-2010 Design & Technology program - Community College ROC Eindhoven, The Netherlands.
2006-2008 School for ICT, system administrator - Community College ROC Eindhoven, The Netherlands.

Skills

Microsoft: Windows 98, 98 SE, 2000 Server, XP, 10
Apple: Mac OS 9, Mac OS X
Programs: Adobe CS6, Office, Processing, Arduino, HTML, CSS, jQuery, PHP, Cura, SI3cer, SolidWorks, Fusion 360, InVision

Hobbies

Bouldering:

After I did my Exchange Program in New-Zealand I'm pretty active with climbing. Since there are no actual mountains or high rocks in the Netherlands, I gathered some friends to go visit the local Bouldergym. Now we can be found at Monk in Eindhoven each week.

Photography:

I grew up with photography because my mother is a professional photographer. Lately I started working with an analogue Hasselblad camera of hers. I took pictures of my brother's wedding. I also now work on my own projects dealing with ballet 'Back to Basics' and the city 'City Reading'.

English literature:

During my high school time I encountered English literature. Ever since I read English Fantasy and Science Fiction.

Films and TV series:

I grew up without television because my parents choose not to have one. When I started to live on my own and through the internet I became interested in American television series and film. I am watching such series since 1998. This gave me a lot of knowledge about the development of IT implementations in the daily live of people.

Bicycling:

Since I assembled my own bike i can't stop. It is based on the design of a bike for indoors cycling which means that the bike has as few parts as possible. I have tested this bike in real life and am in the process of adding one last part.

Work Experience

November 2017 - April 2018

Company: EKWC

Function: Intern

Task:

- Project Struo 3D print database (realisation website).
- Research target group.
